Real-Time Access to Reporting Dashboards with Beeline

biorasi™
CONFIDENT CLINICAL TRIALS

Beeline is our sponsor portal with access to the metrics you need to keep your trial on track, 24/7. Built on our proprietary Clinical Trial Management System (CTMS), the Beeline portal pulls all of your clinical trial data together into one multi-faceted, easy to read dashboard.

Make confident decisions at every stage of your study

Predictability & Early Risk Intervention

- Surface issues earlier than traditional CRO models by 14 days or less
- Improve on-time delivery by +70%

Execution Efficiency with Control

- Shorten FPI timelines by 20 to 30%
- Reduce issue resolution from 5+ days to 2–3 days

Capital Discipline & Margin Protection

- Reduce out-of-scope spend by ~16%
- Save 6–10 hours/week, per project team via live dashboards

Access to 15 Beeline Dashboards Including...

Site Activation

Filter activation data at the global level - by status, country, and document completion.

Enrollment

Track patients across projected and actual screening and enrollment.

AEs and SAEs

Access a multi-dimensional analysis of all adverse events.

Protocol Deviations

Take a proactive view of all major and minor deviations by type, site, and more.

Financial Transparency

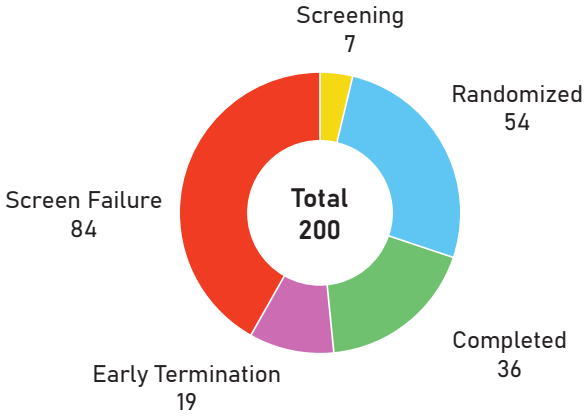

Monitor budget utilization alongside milestone achievement to identify risks before they impact the trial.

Beeline Tools

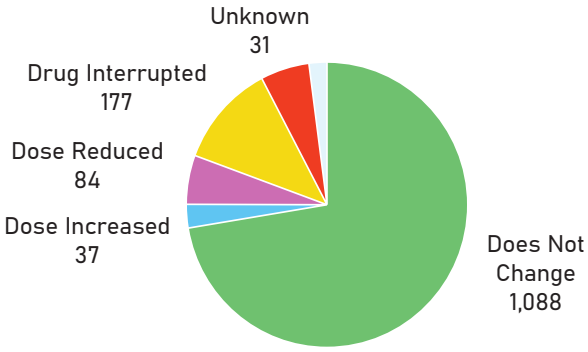

biorasi™

Beeline means business intelligence, reporting, and more.

Subject Status

Action Taken

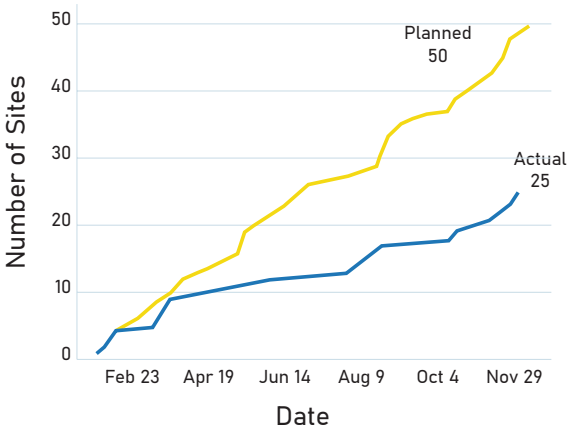

73 Withdrawn due to AEs

Bee Proactive

Know where your clinical trial is at every stage, and address obstacles before they happen.

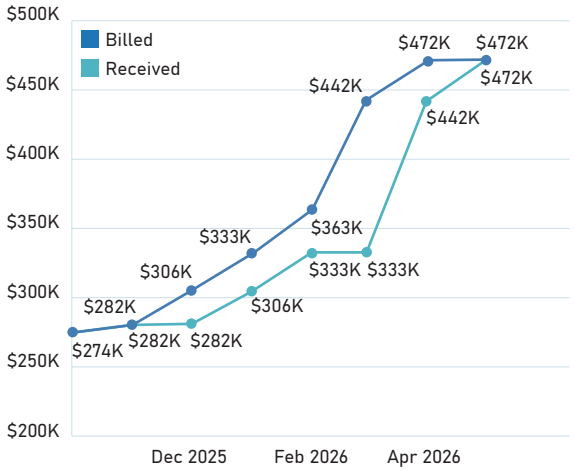

Site Activation Timeline

Bee Safe

Track study activities to monitor your safety goals for patient care data.

CRO Services Billed vs Received

Bee Accessible

Get real-time access to reporting on key milestones and short/long-term goals.

Bee in Control

Confirm that study progress matches budget expectations with our new financial transparency dashboard.
